DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Response filed 8/15/05, with respect to the rejection of claims 1-5, 8-11, & 16-17 under 35 USC §102, the rejection of claims 6 & 20 under 35 USC §112, and the objections to claims 7, 12-15, & 21 have been fully considered and are persuasive. Therefore, these rejections and objections have been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of 35 USC §101.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-7 & 13-17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-7 & 13-17 are drawn to non-functional descriptive material. MPEP 2106.IV.B.1(a) (Nonfunctional Descriptive Material) states:

Descriptive material that cannot exhibit any functional interrelationship with the way in which computing processes are performed does not constitute a statutory process, machine, manufacture or composition of matter and should be rejected under 35 U.S.C. 101.

Art Unit: 2624

Where certain types of descriptive material, such as music, art, photographs and mere arrangements or compilations of facts or data, are merely stored so as to be read or outputted by a computer without creating any functional interrelationship, either as part of the stored data or as part of the computing process performed by the computer, then such descriptive material alone does not impart functionality either to the data as so structured, or to the computer.

For example, music is commonly sold to consumers in the form of a compact disc. In such cases, the know compact disc acts as nothing more than a carrier for nonfunctional descriptive material. The purely nonfunctional descriptive material cannot alone provide the practical application for the manufacture.

MPEP 2106.IV.B.1 (Nonstatutory Subject Matter) states:

When nonfunctional descriptive material is recorded on some computer-readable medium, it is not statutory since no requisite functionality is present to satisfy the practical application requirement.

Claims 1-7 & 13-17 currently recite a screen configuration. There is no functional relationship imparted by this data to a computing device. Therefore, the claim is drawn to non-functional descriptive material which is non-statutory per se. The fact that the claim recites a computer readable medium does not provide the utility (i.e., practical application in the

Art Unit: 2624

technological arts) required under 35 U.S.C. 101 for the manufacture.

Allowable Subject Matter

4. Claims 8-12, 18-20, & 22-24 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

As noted above, Applicant's arguments, see Response filed 8/15/05, with respect to the rejection of claims 1-5, 8-11, & 16-17 under 35 USC §102, the rejection of claims 6 & 20 under 35 USC §112, and the objections to claims 7, 12-15, & 21 have been fully considered and are persuasive.
